The IT Teaching and Learning Services team will provide a series of educational technology training sessions in Fall 2022. Please check out the ITS Training page below for schedules and Zoom links. Please contact the IT Service Desk (helpdesk@uri.edu) if you have any questions.

- Oct 13 - Implementing Specifications Grading in Brightspace
- Oct 19 - Organizing and Sharing Panopto Videos
- Nov 09 - Polling Options Overview
- Nov 10 - Working with Brightspace Gradebook
- Nov 16 - Using Brightspace Group for Student Engagement
- Dec 07 - Creating Panopto Video Assignments in Brightspace
- Dec 07 - Discussion of Open Educational Resources (OER)
- Dec 15 - Right Sizing Graphics, Videos and Files

As you may know, October is National Cybersecurity Awareness Month. ITS Security will be hosting weekly virtual sessions discussing the following topics:

- Oct 25: Phishing: Recognizing and Reporting
There are also plans to have a tent set up on 10/13/2022 outside of the Memorial Union to discuss Cybersecurity topics with the URI community from 11am to 1 pm.

Visit URI Cybersecurity Month 2022

ITS Research Computing Services is a relatively new department with the goal of providing URI researchers access to cutting-edge computing equipment (HPC/AI/Data/Quantum); offering hands-on training, support and consultancy to enable computational research; leading and assisting with seeking grant funding; and facilitating access to a network of potential collaborators and resources (at URI and in the region) for interdisciplinary and multidisciplinary research.

Self-Service Brightspace Course Merging Available

Self-service merging (see instructions) is available for faculty merging sections for which they are designated as the Instructor or Admin of Record in e-Campus.

When a course is merged, one set of content is presented to all of the sections in the merged course site. Student roasters are also combined. Please be advised that this process can take up to 24-48 hours to complete. Administrative merges will be performed upon request after you submit a corresponding ticket to the Service Desk at https://its.uri.edu/.

Self-Service Brightspace Course Merging Training Sessions will be provided to the
University community on Oct 20 and Dec 15. Go to its.uri.edu/training for details.

Camtasia/Snagit Licenses Available to Contracted TAs

URI's TechSmith Camtasia and Snagit license provides access to faculty, and to staff and students (including both contracted TAs or students in similar positions) who are engaged in the creation of course content. This license, however, does not cover use by a class of students to do homework for a class.

Training

There are many opportunities to learn about technology at URI. We have scheduled training sessions as well as live Zoom drop-in sessions (listed as TLS-Ed Tech Faculty Drop-in Support) on the Training page at https://its.uri.edu/training. We also offer customized departmental training – if your department would like to receive training on a particular tool or set of tools customized for your needs, please contact the IT Service Desk (874-HELP, helpdesk@uri.edu).
